

WEB DESIGN BRIEF: Backstage

Operations Redesign

1. Project Overview & Pivot

We are transitioning **Backstage Operations** from a basic, task-based freelancer site to a **premium, high-end operational agency**.

Unlike competitors who target tech startups and corporate CEOs, our unique niche is "**The Invisible Backstage**"—high-earning creatives, artists, and specialized professionals (e.g., touring DJs, high-end wig designers, independent accountants) who didn't realize having an elite assistant was an option for them.

- **Core Concept:** We provide high-trust, overnight execution ("We work while you sleep").
- **The Vibe:** Creative Edge meets Executive Security. It must feel elite, modern, trustworthy, and exclusive.

2. Visual & Aesthetic Direction

- **Color Palette:** Deep, premium dark mode base (e.g., charcoal, onyx, or rich midnight blue) with crisp white typography and a sharp, sophisticated accent (like a muted champagne gold or a minimalist electric blue).
- **Typography:** High-end, editorial look. Bold Serif fonts for headings (to feel premium/established); clean, highly readable Sans-Serif for body text.
- **Imagery:** **No generic corporate suit stock photos.** Use high-quality lifestyle/editorial images that show craftsmanship, modern studio layouts, and professional workspaces.
- **Layout Style:** Heavy emphasis on **whitespace**. Remove dense cards, heavy borders, and cluttered elements. Let the design breathe.

3. Page Structure & Copy Blueprint

Header / Navigation

- **Links:** The Model | Expertise | Trust | **[CTA Button: Request Partnership]** *(Note: Remove the word "Services")*

Section 1: Hero (The Premium Hook)

- **Headline:** *You build the spotlight. We run the backstage.*
- **Sub-headline:** *Premium, fully managed operations for specialized founders, elite creatives, and unconventional businesses. From tour schedules and production workflows to back-office systems—we clear your backlog while you sleep.*
- **CTA:** "Inquire for Partnership"

Section 2: The 24-Hour Operations Loop

Keep the existing 3-step timeline (5:00 PM Handoff → 12:00 AM Quiet Execution → 8:00 AM Clean Slate Delivery) but streamline it into a sleek, minimalist horizontal layout or floating cards with premium line icons.

Section 3: "Who We Serve" (Industry Focus)

Create a beautiful 3-column section to replace the old "Add-ons" area:

1. **High-Volume Creatives & Designers:** (Wig designers, fashion labels, custom artisans).
Focus: Order pipelines, supplier tracking, inventory logistics.
2. **Artists & Entertainment:** (Touring DJs, producers, event curators). *Focus:* Booking vetting, contracts, travel itineraries, calendar protection.
3. **Specialized Professional Services:** (Independent accountants, boutique agencies).
Focus: Client intake, document organization, CRM management.

Section 4: The Philosophy (Text Block)

A beautifully typeset quote section emphasizing our mission:

"For a long time, having a premium Executive Assistant was a privilege reserved for corporate CEOs. We built Backstage Operations because the touring artist, the master artisan, and the independent specialist deserve that exact same leverage. You don't need a corporate office to have elite operational support."

Section 5: Pricing Tiers

*Change the names to sound like retainer plans rather than hourly punch-cards. **Remove the "binding fee" and "starter block" text entirely** (these will be handled during onboarding).*

- **Tier 1:** The Catalyst (\$399/mo)
- **Tier 2:** The Growth (\$799/mo)
- **Tier 3:** The Full Scale (Custom)

4. Technical Checklist

- **Domain Migration:** Prepare to shift the site from [.online](#) to a standard, high-trust [.com](#) structure.
- **Footer Clean-up:** Move local tax registrations ("BIR Registered") and administrative compliance notes off the main landing visual and into a dedicated, subtle "Legal" link in the footer.
- **Social Proof:** Design the testimonial section to prominently feature headshots, full names, and company titles.
